

Robert Riehn
Professor
Associate Director of Graduate Programs
College of Sciences

If elected to the Faculty Senate, my first priority is defending the shared governance model that is under challenge at numerous levels. I will further represent concerns of faculty members, such as maintaining an environment in which they can build leading research groups, or ensuring the accessibility of child care.

Robert Riehn received a B.Sc.(hons.) from the University of Cape Town, a Ph.D. from the University of Cambridge, and joined NC State University in 2006 after Postdoctoral Training at Princeton University. His group is undertaking research in biophysics, nanotechnology, and soft condensed matter physics.
