

Roger Narayan
Professor, Biomedical Engineering
College of Engineering

I have served as a Professor in Biomedical Engineering since 2009. I currently serve as the departmental representative to the College of Engineering's awards and research committee. I also serve as the College of Engineering representative for the Evaluation of Teaching Committee and the Committee on International Programs. I have previously served on the Engagement Operations Council and the University Standing Committee on Extension, Engagement, and Economic Development. In addition, I have served as a RTI University Scholar (2019-2021), Provost's Faculty Fellow (2019), Community Engaged Faculty Fellow (2018). I am interested in serving as a candidate for faculty senate to assist with initiatives and policies that support the efforts by students, staff, and faculty to deal with the health and economic challenges associated with COVID-19.
